## AR FLOORCARE

extra-long life. The Athlet Runtime Plus has a runtime of up to 75 minutes and is well-equipped to tackle vacuuming an entire house. Combined with the aerodynamic long-life motor, it provides a genuine alternative to a barrel vacuum for customers looking for cordless flexibility.

With its convenient two-in-one functionality, the versatile Ready's 2-in-1 21.6-volt cordless vacuum with a long life Lithium-Ion battery features a detachable handheld for spot cleaning. It features a motorised brush for thorough and effortless results on all types of floor surfaces and a freestanding design with a maneuverable nozzle to easily reach under furniture.

**Cleanstar** has designed the world's first bagless backpack vacuum, the 24-volt Escape Hybrid, developed to switch between corded and battery power. For added convenience, this innovative machine charges the battery while cleaning. Among the features are a 2.5-litre dust container, two-stage filtration, a washable HEPA H12 filter, Lithium-Ion battery and 18-metre extension cable. A shoulder strap and waist belt with accessory storage, combination floor and upholstery tools, dusting brush and two piece extension rods are included.

The latest innovation from **Ecovacs Robotics**, AIVI (Artificial Intelligence and Visual Interpretation), made its debut at IFA in Berlin. Designed to reduce manual intervention with the robotic vacuum

LG CordZero Handstick Vacuum A9

AEROSCIENCE UTILISES POWERFUL MINI WHIRLWINDS OF AIR TO SEPARATE OUT DUST PARTICLES WHILST THE LG INVERTER MOTOR ROTATES AT HIGH SPEED, CREATING RAPID AIR FLOW INSIDE THE VACUUM'S CYCLONE CHAMBERS.

cleaner, object recognition and spatial recognition help avoid common household items, such as shoes, socks and smartphone cables that can often obstruct the cleaning path.

Smart Navi mapping and navigation technology, available on the Deebot 900 and Deebot 710, scans, maps, and plans an efficient cleaning path adapting to a home to provide thorough and systematic cleaning. Users will be able to see how the cleaning task has been completed with a visual map. The Deebot 710 also features an upgraded Max Mode that increases suction power by up to two times.

Ecovacs Ozmo mopping technology in the Deebot Ozmo 930 and Deebot Ozmo Slim delivers both vacuum and mopping capabilities. Paired with the Ecovacs app, users can set cleaning schedules, select cleaning modes and monitor the cleaning process. The Deebot robovac are compatible with Google Home and Amazon Echo for voice control. **AR**
