Water-based floor care system

The SportKote PC sports floor care system consists of three elements; the first is a water-based gym coating system that offers increased depth and extreme durability. The second component is a deep cleaning floor preparation solution which pulls dirt and soil from the existing finish and prepares the substrate for maximum adhesion of the final component; a restorative cleaner which promotes bond resilience and durability in the finish, while extending the life of the floor itself.

Lightweight cordless blower

Makita's cordless blower DUB362Z uses two of Makita's 18 Volt batteries to deliver supreme performance, matching the capabilities of its petrol driven counterparts. The lightweight blower has a three stage telescopic nozzle, a variable speed dial and a lock on switch. Its variable speed abilities, double housing and noise absorbing internal sponge, makes the blower the perfect option to assist with reducing noise and petrol emissions around the workplace.

High-speed battery burnisher

The Origin Vitesse battery burnisher uses Lithium-Ion batteries coupled with an intelligent battery management system to provide a 51cm pad that spins at 2500 RPM for over 2.5 hours. Unlike LPG powered burnishers, there is no noise, no emissions, no fuel, no oil and no scheduled maintenance. Weighing 60 kilograms, the machine is perfect for modern facilities which demand quiet, environmentally friendly cleaning.

SAFE + HEALTHY SOLUTION

Anti-splash urinal screen

Cleanstar's anti-splash urinal screens are designed to avoid splashing from taking place inside and outside urinals. The micro-tube patented technology pores in the screen open when in contact with urine, releasing a much stronger fragrance due the plastics reaction to warmth. The fragrance is then preserved with the pores close. The screens are built with a unique draining system in every micro-tube leaving the screen residue-free and preventing malodours.
