

licence and can now offer pest control as part of the service.”

Located in a big warehouse full of equipment, chemicals and machines, Bryan employs six staff across Classique Chem Dry and Bio Cleanse and each have received training from Bryan. They work out of four Chem Dry vans and Bryan uses a fifth van for Bio Cleanse, which is intentionally bare of signage to be more sensitive to the nature of the industry.

“Our business has grown a lot. We’ve taken little steps but over time it’s resulted in leaps and bounds,” Bryan stated. “We’ve reinvested everything back into the business, but now we’ve reached a point where we have to ensure we can service all the work we can offer. The focus is now taking on more staff, and more training for them to make the business operational without Chris and I being so hands on.” So while Bio Cleanse and Classique Chem Dry continue to expand, the Norris’ are looking for a bit of rest and relaxation, knowing their businesses are in good hands.

Quiet and light Xpower air movers released

Described as the lightest and quietest air movers available in the world, Cleanstar’s Xpower range of five models is complemented with an Axial fan air mover. According to the marketer, these units are ideal for many industries other than the carpet and restoration segment.

Used primarily to dry flood-affected carpets and floors, these Xpowers can also be used to efficiently dry painted walls, move air around garages and dry spills.

They are built from strong, lightweight ABS plastic using state-of-the-art injection mold technology. That helps them withstand rough usage and also makes them particularly lightweight.

Select Xpower air movers have power outlets on-board, allowing them to be connected to each other (daisy chaining); increasing the power of the air moving to get the job done quicker, utilising the same power outlet and creating less mess with leads.

The Xpowers feature a kickstand that offers an extra 20 degree angle, perfect for drying furniture and other elevated objects. The Axial fan also has 360 degree rotation, making it suitable for all jobs.
