

High solids finish for high traffic areas

Designed with the latest polymer and floor finish technology, Pioneer Eclipse's OmniGuard produces what is said to be 'a spectacular off-the-mop shine'. Its 25% high solids finish is ideal for high traffic and high maintenance facilities like schools and retail stores, but it also holds its shine incredibly well in low maintenance applications. OmniGuard's high solid formulation produces extreme gloss that withstands the effects of crowded market places in any weather condition.

Floor tool's bigger dirt pick-up

The Wessel Werk 'Designated' floor tool is said to deliver 10% more dirt pick-up than comparative units. It features a (10%) larger intake; 32mm neck size; and comes in an attractive and lightweight design. Designated has non-scratch soft rubber wheels for quieter operation; four wheeled base for easier movement; and a low profile design.

Ultra slim towel a cost-in-use saver

A recent addition to the Livi Basics range is the ultraslim 150 sheet, 1-ply hand towel complete with Livi quality guarantee - 'user satisfaction and cost-in-use savings'. Micro diamond embossing delivers a 'soft-touch' and more absorbent towel. Available in individually wrapped packs, Livi Basics ultraslim towel is made from 100% virgin fibre and certified by the Programme for the Endorsement of Forest Certification (PEFC) and HACCP Australia.
