

Big sweeping effort from a more compact machine

Designed for heavy duty sweeping, the battery-powered RCM R850 is said to be 'the biggest ride-on sweeper with manual dump in the market'. The large 1390mm sweeping width (with two side brushes), complemented with a 120 litre hopper capacity, delivers the productivity levels of much larger machines. The R850 is particularly robust, constructed with stainless steel and high quality components.

Long lasting wire reinforced backpack hose

Just released onto the Australian market, Cleanstar's Wire Reinforced Backpack Hose is described as a superior quality, longer lasting and more durable hose than the standard hose. It keeps its shape and stands up to the rigors of commercial cleaning. That means there's no need to replace hoses as often as usual when using a standard hose. Cleanstar's Wire Reinforced Backpack Hose is available to suit various backpack vacuums including Ghibli T1, Pacvac, Pullman, Nilfisk and Hako.

Compact ride-on scrubber's heavy-duty performance

The Tennant T12 is a compact, manoeuvrable ride-on scrubber that delivers heavy-duty performance. The combination of a tight turning radius, optional scrubbing side brushes and a low 63 dBA sound level, allows for cleaning in a variety of spaces. Engineered to be easy to operate and maintain, the T12's 1-Step Start Button activates the scrubbing system, maximising uptime, reducing operator training and increasing productivity.

Reliable and flexible uprights offer superior IAQ

The Sebo 370 and 470 Comfort upright vacuum cleaners are said to provide superior performance, outstanding reliability and are easy to maintain. A comfortable handle grip and low handle weight allow for easy, efficient movement while the 175 watt brush motor turns off when the machines are upright. The flat-to-the-floor design and telescopic tube system add to the overall cleaning flexibility while a sealable filter bag makes for true hygienic debris disposal.

Effective solution for untidy washrooms

The SaniBag sanitary napkin dispenser and the Sanitary Napkin Receptacle offer a neat and effective solution for untidy washrooms and toilet cubicles. A 'no fuss' sanitary napkin disposal unit complements the system. Within the unobtrusive Sanibag is a hook where up to 100 plastic sanitary napkin bags can be attached. The bags are easily and hygienically accessed from the bottom of the unit. A compact, hygienic unit, the Receptacle has a no-touch emptying feature.
