

### Durable wipes for surface cleaning and disinfection

V-Wipes are durable, non-hazardous and non-flammable wipes that are safe to use on most surfaces and equipment in the healthcare environment. In addition, the pH neutral formulation and high-quality, densely apertured fabric offers a streak-free cleaning. Thanks to their single-use application and versatile packaging, V-Wipes are also an effective aid in the infection control process.

**OZONE  
SANITATION**

### Chemical-free solution to carpet extraction

The Minuteman X17 - CFS (chemical-free solution) is a self-contained 17" (43 cm) carpet extractor that requires no chemicals or disinfectants. The X17-CFS uses ozone to sanitise, deodorise and purify soft floors using an innovative ozone technology which kills pathogens more broadly than chlorine or other chemical sanitisers. It also creates fewer by-products than chemicals and uses less energy than sanitising with heat. The extractor is ideal for use in all locations including healthcare facilities and schools.

### Ultra-quiet vac tackles larger areas

The Butler vacuum is a 1200 watt dry vacuum cleaner that is ideal for cleaning large areas such as hotels, schools, offices and churches. It can also be used in the home, apartment or small office. Each vacuum comes with a 2.9 metre hose, dusting brush, crevice and upholstery tool, wessel-work low profile floor tool and a hard floor brush. The ultra-quiet vacuum has a 10 litre capacity and a durable metal shock-proof body.

### Carpet tool that tracks cleaning progress

Technicians can view their cleaning progress while enjoying the high-volume cleaning effectiveness of the Sapphire Scientific Upholstery Pro. The Upholstery Pro's glide head and control valve reduce overspray and over wetting. Made of durable high-impact plastics, its continuous flow design delivers better cleaning and drier fabrics and its flexible hose allows easy access into even the tightest corners. The Upholstery Pro can be used on a wide range of fabrics and soiling conditions.

### Fast and easy-to-use room deodorising unit

A fast and easy-to-use room deodorising unit, Freshwave IAQ's OdorDoc Vapor Phase Unit is claimed to be the ultimate solution for fragrance-free removal of foul odours. It removes odours without masking them using a proprietary blend of essential oils and extracts that create a fresh, scentless area. OdorDoc works by discharging sub-micron size molecules into the air, eliminating malodours in the air and on surfaces while also penetrating deep into draperies, upholstery, bedding, wallpaper, carpets and other surfaces.

### Improve hygiene with high-absorbency cloth

Equipped with double action holes to trap dirt, absorb spillages and then rinse out clean, Chux Superwipes ensure surfaces are thoroughly clean and protect against the cross-contamination of surfaces. Chux Superwipes are a cost-effective choice since they are durable to withstand multiple uses. Chux Superwipes are available as individual cloths or in perforated rolls for bulk use. They come in regular, biodegradable (for everyday cleaning) and 'thicker and thirstier' heavy duty varieties.

**EASY  
TO REFILL**

### Unobtrusive sanitary napkin disposal bin

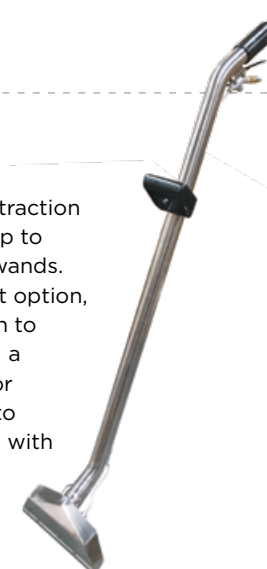

Pall Mall's small, unobtrusive SaniBag Dispenser is the perfect complement to an office's sanitary napkin disposal bin. After use, the bag and its contents are simply dropped into the bin and removed when the bin is cleared. Also, as the dispenser measures only 150 x 100 x 30 mm, it can be quickly and easily attached to the wall in a convenient position. The dispenser is extremely easy to refill, and refills are supplied in batches of 50.

### Light and strong titanium wand

Suitable for use with portable extraction machines, the titanium wand is up to 25 per cent lighter than regular wands. Available in a two-jet and four-jet option, the wand has a low profile design to get under low lying furniture and a stainless steel precision nozzle for best performance. It is resistant to corrosion and has a double bend with a 12 inch head width.
