

Fresh Wave's natural odour control for multiple sites

Part of Odour Management's commercial range, Fresh Wave IAQ gel provides up to 90 days of 24 hour continuous odour control to susceptible areas including washrooms, offices, kitchens, patient rooms, gyms, and vehicles. A proprietary blend of all natural ingredients, the refillable jar removes odours at a fraction of the cost to alternative systems. IAQ gel is non-flammable, non-allergenic and free of VOCs.

German engineered Designation low profile floor tool

Wessel-Werk Designation's low profile floor tool is German engineered and built to withstand the rigors of commercial cleaning. It features a 32mm neck size that suits most vacuum cleaners; has a larger air intake for 10% more dirt pick-up; and is lightweight. Offered in a new, attractive design, Designation comes with soft non-scratch full rubber wheels and rubber bumper protector that protects furniture, skirtings and walls against markings.

SolutionzCloud delivers data based on Modern Cleaning Award

Templa CMS is said to be the only fully integrated software solution for cleaning companies. This year Modern Cleaning Award Interpreted Time and Attendance has been added to its list of solutions. Fully hosted, easy to deploy, SolutionzCloud provides cleaning companies with a cost effective way to track Actual VS Assigned hours on-site. Unlike other systems, actual hours are interpreted based on the cleaning award, for easy and accurate payroll processing.

Checkuponline makes healthcare compliance auditing easier

With the introduction of cleaning standards and advances in technology, Checkuponline can simplify and streamline data collection facilitating compliance with the standards. Checkuponline adopts a point of time approach using portable devices such as tablets. As audits are conducted they're continuously saved to a database and reports are generated with the simple click of a key. Checkuponline is an innovative and productive option for healthcare facilities' cleaning standard auditing.
