

Polystar multi-purpose polisher sander/cleaners debut

Recently released, the Polystar orbital polisher and cleaner, and Polystar sander and cleaner, offer users competitively-priced multi-purpose machines that can be used efficiently on numerous sites.

Marketer Cleanstar points out that both machines are designed for commercial as well as domestic tasks.

The Polystar Orbital Floor Polisher and Cleaner (PS-001) is designed to strip, wax, buff, polish, sand and refinish hard floor surfaces including marble, tiles, vinyl and wood.

It can also be used to dry clean carpets.

Lightweight (14.8 kg), it is easy to carry up and down stairs while its small circumference allows operators to cover tighter areas.

The PS-001 has a 250 watt (240 volt) motor, 33cm working width and a 150 rpm working speed. It comes with a comprehensive range of tools and utilities including brushes and pads.

The Polystar Orbital Floor Sander and Polisher (PS-002)

incorporates a dust extraction outlet that connects to a vacuum cleaner, thus being able to suck up debris while sanding wooden floors and surfaces.

The PS-002 has a 275 watt (240 volt) motor, 25 cm working width and 300 rpm working speed. It comes with #40, #60, #80 and #120 sanding paper grades, microfibre pad and a polishing pad.

Both machines come with full electrical safety approvals.

High traffic, Public Washroom 'pong' eliminated...for good!

THE PROOF:

Before using Sanitaire Bio Cleaner and Bio Blocks, this high traffic, Public Washroom in Perth (Over 400 visits per day) required virtually continuous servicing using up to 4 different chemicals to mask odours and maintain hygiene.

After trialling Sanitaire Bio Cleaner and Bio Blocks for 2 months, the odour wasn't just masked, it was totally eliminated.

Maintenance cycles were reduced too*.

Customer complaints dropped to zero and chemicals cut to only 2 products.

(*Depending on the frequency of use of the urinal & booths).

Sanitaire™
Bio-Products

'Naturally powerful cleaning!'

6/381 Thompson Road, North Geelong, Victoria 3215

Ph: 03 5277 0117 Email: biosupport@sanitaire.com.au

THE PRODUCT: Bio Cleaner & Bio Blocks

Specially formulated for use on all washroom surfaces to clean and maintain low volume and waterless systems.

No pDCbs.

The bacteria double every 12 minutes, actually 'feeding' on the organic compounds, constantly converting and neutralising the offending organic waste as washroom traffic returns.
