WATERKING

30L WET & DRY COMMERCIAL VACUUM CLEANER

This wet and dry vacuum with H13 HEPA filtration is ideal for commercial cleaners. The Waterking displays outstanding performance on a range of surfaces and suction power can be adapted to any kind of flooring. With the integrated blower function, filters and work benches can be blown clean, or wet surfaces dried quickly.

KEY FEATURES:

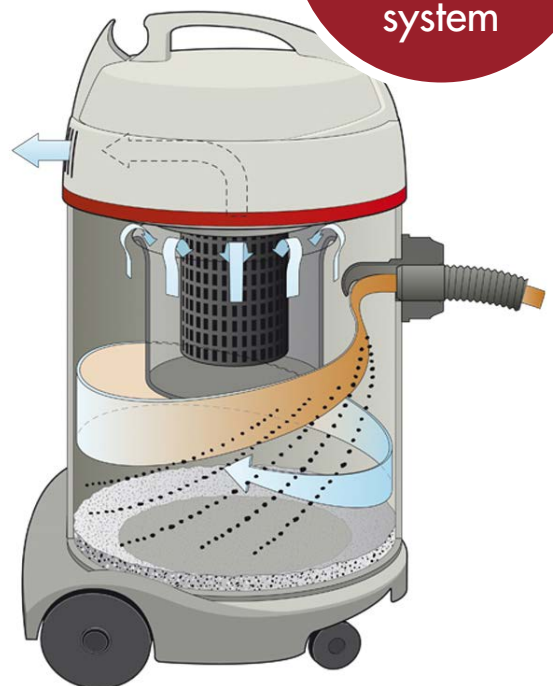

Cyclonic Water Separation System

When vacuuming up water, the cyclonic action inside the tank is designed to avoid foaming of the water and is less likely to interfere with the motor and therefore increase the lifespan of the machine.

Reliable Float System

The responsive floating gauge even reacts during heavy foaming.
